## Magserver Visual development software

Magserver studio is the essential tool for individuals performing basic Magento development tasks. It simplifies the creation, debugging, and deployment of applications on a variety of platforms including Magento, PHP, MySQL and the Cloud.

#### **Magserver Visual development**

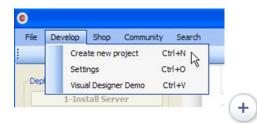

studio comes with integrated support for IDE development, as well as Quick search and drag and drop interfaces to ensure the help of high-quality solutions. Now you can develop your Magento sites offline.

#### MagServer details:

#### Magserver with Windows 7 support

is a software suite that runs on the latest core Microsoft platforms— Windows 7 Ultimate, as well windows XP, Vista from a professional Operating system to support the Magento platform.

#### Easy development

Writing application code often requires having numerous designers and editors open at once. Magserver helps you organize your digital environment with support for multi-monitor, which makes it easier to manage the way you work.
